## **Career objective**

My Name is Gurwinder Singh, I've been a web developer since 2015. For the last 3+ years, I specialized in front end and web application development.

My front-end skills:

✓ Full Stack Wordpress

✓ PHP

✓ JavaScript (ES5/ES6/ES7, Babel)

✓ jQuery, Bootstrap

✓ HTML 5, CSS3 with LESS/SCSS

✓ responsive web

✓ psd to html

✓ psd to wordpress

For back end, I usually use PHP, MySQL. I have excellent skills with wordpress (strong API/Drush skills, e-commerce). Therefore, I can work like a full-stack developer if needed or make a quick integration with front end. Over time, I've gained experience with different APIs (Google, Stripe, Twitter, Facebook and other RESTful services) and many other technologies like sql, nosql, etc. I want to be an expert at single page applications (SPA) with next tech stack: JavaScript, modern HTML with CSS to make isomorphic apps.

I not only understand the develop cycle, but I understand business goals and can work like team leader/head developer if needed. As a responsible man and skilled professional from India I'd like to help you with your project.
