**“wpcook is always focused in high performance
by mapping web ideas accurately as per
customer needs.”**

SOME OF MY BEST PROJECTS

<http://lionguardhomes.com/> (Property Management CMS)

I have built this website for Lion Guard Investments which is dealing with property management of beautiful homes all around Atlanta. It also avails lease purchase facility before buying homes.

I have developed front-end with clean back-ground and developed back-end of advanced home search filter availing total control to my client Mr. Aaron Powell. We have also developed and integrated Map API and contact form. It has made a great impact on his business for buying/selling and renting to property seekers.

<http://www.easyfreight.online/> (Baggage Booking Functionality)

Easy Freight offers various methods of freight modes to customers needing to move their excess luggage or personal effects/household belongings to international and interstate destinations, by Air, Sea or Road/Rail.

I handled a big project easily as per client's expectation! Client needs to allow import and export of airline baggage rates in CSV format and to manage output pricing to customers based on CSV database (text only, no calculating needed). Client is required to email customers the quote and multiple CC emails to admin panel and also embedded within the emailed quote to allow customers to go ahead and make an online booking. I along with the help of freelance team easily handled all tasks with core focus on design and layout.

<http://gclub.co/> (PSD to WordPress)

Gclub the web, people can find and book the slot with utmost comfort in prayer gaming casinos. It is an online version of the entire mobile system for iphone, android and also tablet for detailed information on the different gaming types.

In this project, I have developer advanced mobile responsive site specifically for mobile. I have developed custom CSS for hiding slider but showing sticky header while scrolling down.

<https://www.gclubtm.com/> (PSD to WordPress)

This is an online site for Gclub Casino which avails people with gaming in casino while having total assistance in how to play the games. It provides experience in variety of Casino games while providing the banking facility also.

This is an ongoing project which is having 50 files to be converted from PSD to WordPress. It is almost about to complete. It is our best front-end and WordPress customization done ever!

<http://formzi.com> (Web and Graphic Design)

Formzi is a cloud hosted mobile business apps and forms as a service to create custom forms, streamline the data collection and analyse data - providing a very efficient alternate to paper forms.

It consists of a web application for administrators to design custom forms, assign jobs and get insights from data collected.

Forms created can be accessed via web forms or Formzi mobile apps (for iOS and Android tablets & smartphones), to let field staff / users collect data on-the-go.

Formzi can be used in any industry to create custom forms with an intuitive visual form builder in any language and create applications with infinite possibilities.

<http://innodel.com> (Pixel to Pixel Front-End Development)

Innodel Technologies is an IT consulting and software development service provider company helping clients globally, implement software solutions by leveraging cutting-edge technologies.

It proposes solutions in IT consulting & services, offshore development center, application services, product development & support and Migration & re-engineering.

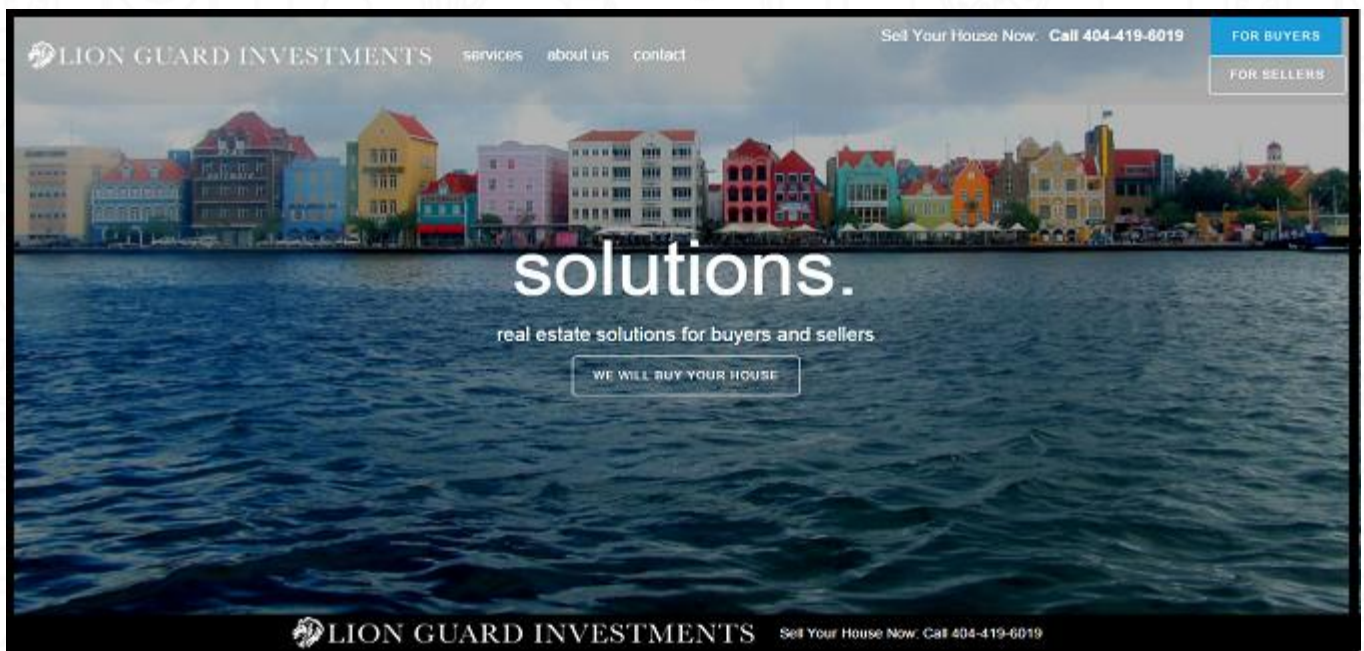

I have designed and developed this website on WordPress platform with the use of themes, plugins, customization with best front end development in html and css.

Gclub is having hundreds of casino games available. Games can be played easily on anyone's own home. The games include slots, roulette, dice, baccarat, poker and black jack is open 24 hours, so you can play the game easily, anywhere, anytime!

This is the best PSD to WordPress project I have ever done! Client provided many PSD files and I have converted all within 5 days while caring about layout, fonts, colors and responsiveness.

<http://lionguardinvestments.com/>
(Mobile Design and Speed Optimization)

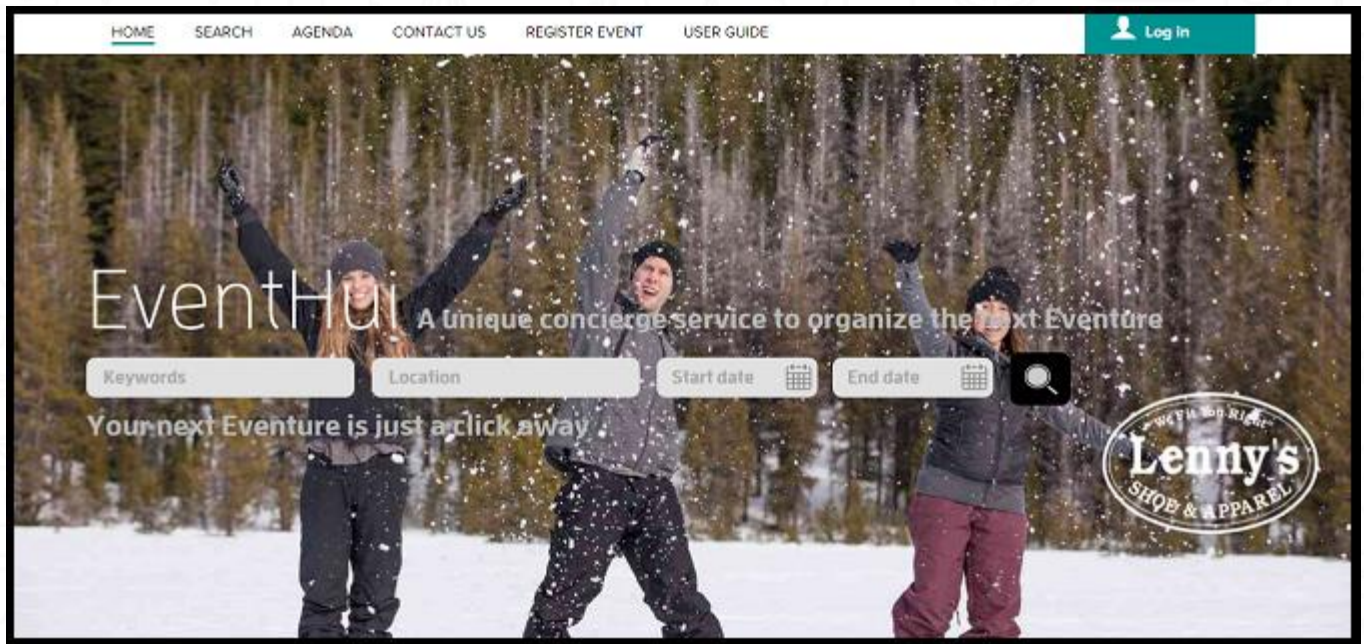

This is my first Upwork job portfolio in which client is required mainly 3 tasks to complete:

- 1) Get a phone number on the header of the site in an appealing design.
- 2) 2) Improve speed of website.
- 3) 3) Optimise Website for Mobile device viewing - only slight modification needed - already decent mobile friendliness.

Client is greatly impressed by my work and given me full rating and reviews.

<http://www.eventhui.com/>

(Account Login and Content Management System)

EventHui is a team of athletes, event organizers and adventurers who enjoy the finer side of life. Its contributing staff of luxury specialists, travel writers, athletic business developers and food critics, among others, continuously update events and host city information to ensure the next event customer attends is an experience perfectly tailored to him.

I have developed front end with multiple backgrounds using html, css, JavaScript and Bootstrap. It's back-end is developed using WordPress and PHP plugin customization.

<http://newsite.com.au/> (Woo-Commerce)

Wholesale Party Goods is an Australian owned business delivering bulk plastic disposable products at wholesale prices direct to consumers online. It is offering party in whole Australia at free shipping.

I have developed the best Woo-Commerce site quickly within 3-5 days while having add to cart option and payment processing system. It is an easily manageable CMS I have developed so far!

<http://actionillustrated.com/> (Woo-Commerce)

Action Illustrate design vector artwork within CorelDraw! The Action Illustrated also serves customization online design software that allows you to create your own custom online t-shirt designer website.

I have developed E-Commerce WordPress website with multiple sliding effects and front-end in html, css and JavaScript.

<http://piratelife.co/> (Woo-Commerce)

Pirate Life is a graphic line offering high quality apparel as well as cups, stickers, and lots of other cool boot for hip new life style. It delivers great designs for fishing tournaments, dive shops, and fishing charters, as well as a perfect gift for your pirate loving friend.

I have built up the WordPress website with great Frond End Sliding & Navigation Effects in E-Commerce platform.

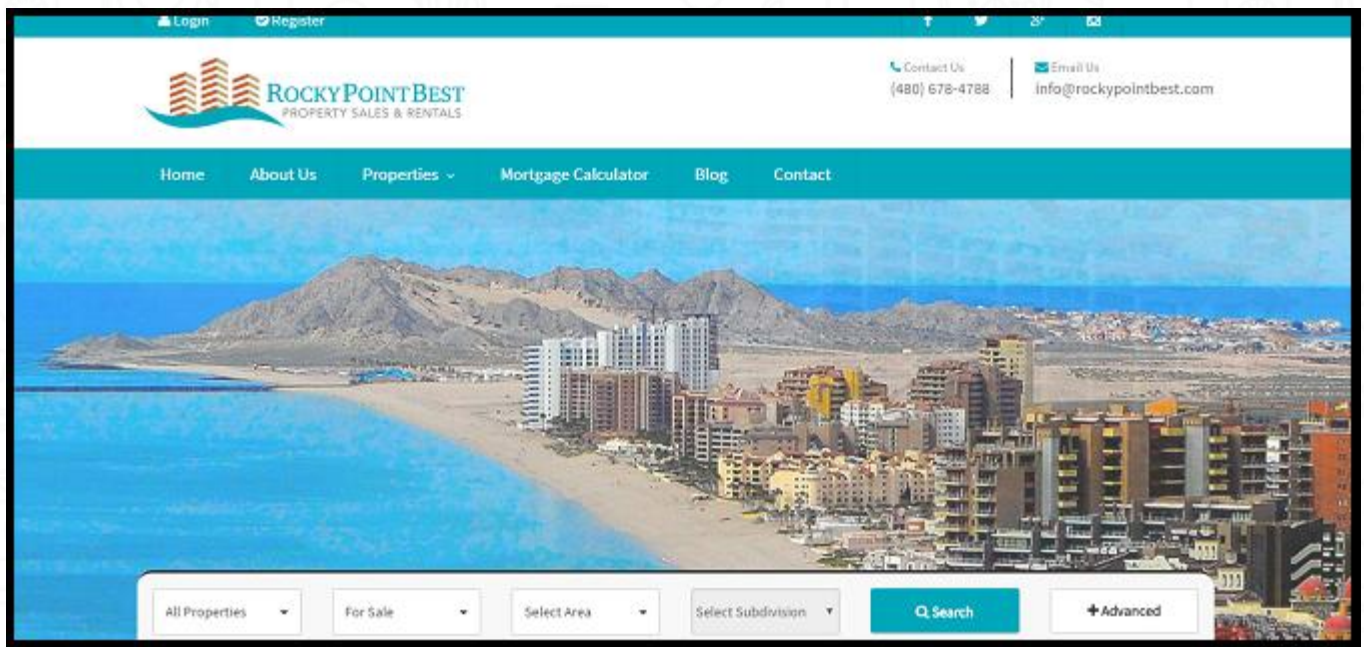

<http://www.srinivasavenkatappa.com/> (Personal Portfolio WordPress Design)

This website is about a personal blog of a guy having 25 years of International telecommunications management experience in emerging markets – India, Indonesia and Nigeria.

I have developed this website using theme customization, plugin integration and front end development by adding great sliding effects.

<https://rockypointbest.com/> (Real Estate WordPress Development)

This website is about specialized services in residential and commercial real estate, property law, investments, fractional sharing and LLCs.

It has gained accomplishments, recognition and public credentials having scope in property all over the world, untains of knowledge and experience to Rocky Point Best.

I have built up a property content management system with a WordPress based platform for this project dealing with marketing, tenant Management, facilities management and accounting of its property business

<http://www.specialtgroup.events.com/> (Full HTML-CSS-JS Customization)

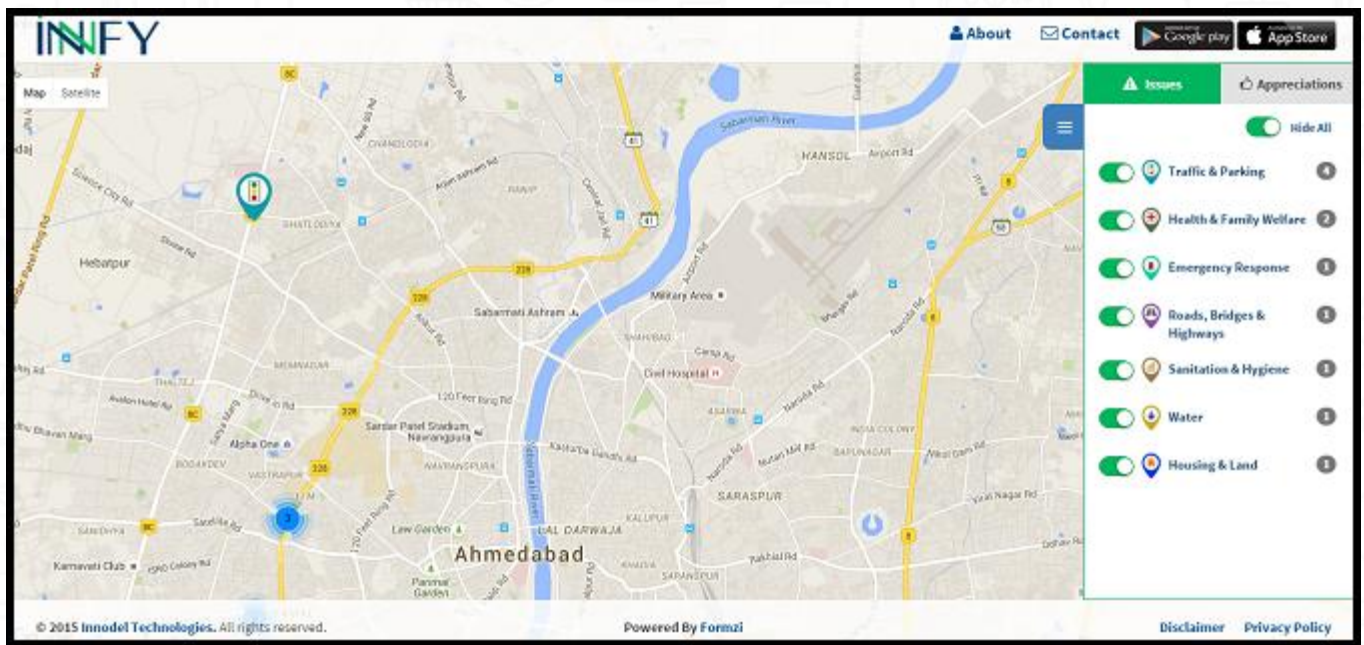

Special T Group Events has developed its event application as a series of simple questions which allow their staff to develop an understanding of the details of customers' event.

This information will be vital in determining their needs and the potential merchandise sales, capture rate and average transaction amount of your event.

I have developed this website for better user experience and User Interface Design by WordPress Content Management System. It is having a back-end panel for data warehousing and evaluation purpose.

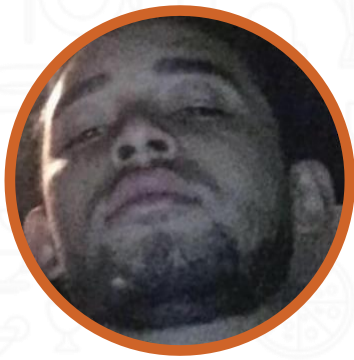

<http://innfy.org/> (Graphic Design and Front-End Development)

INNIFY is designed to facilitate local authorities by geographically mapping issues and appreciations reported without sending any person in the field. The data (issues/appreciations reported) collected from the application can be further analyzed, processed and prioritized based on the severity to address. The challenge could be that, local authorities will need to be geared up with adequate resources to resolve reported issues in timely manner.

I have developed this Web & Mobile application having the access through GPS by common public and for catching public attention, we have implemented UI/UX design and used of HTML, CSS, Bootstrap and JavaScript in front end development.

Client Testimonials

I worked with Mehul Jadav directly, who is a perfect creative gentleman, always available, fast and professional. On top of all that he has done a great job.

- *Carloz Perez*

Fast! Easily understood my problem. Got a pretty difficult online quote and booking system implemented as per all my requirements. Glad to have found these wpcook guys as a resource!.

- *Nick Tylor*

Easily handled tasks and made it look good. Was willing to change as needed and made requested changes quickly in real time with me online - whatever I wanted he was able to do. Excellent - a pro and pleasure to work

- *Aaron Powell*

These guys tried very best to solve most of my database related problem for my awards website. They are good eLancer. I have a job very often and I will offer it to them first.

- *Viktor K.*

About Me

UI/UX Designer and WordPress Developer

Hello,

My name is Mehul Jadav and I am a founder, UI/UX designer and WordPress developer at wpcook, a co-operative team of freelancers providing web design and WordPress development Services. Having 3+ years of solid experience, I am a technical lead for innovative development in services and technology strategies. I laid the foundations of wpcook while pursuing my M.C.A. degree from Gujarat Technological University in 2014 as an outcome of my dream to build a team which basically focuses on providing highest standard freelance services in WordPress Development and Customization, which has grown to a thriving team servicing high-level active clients worldwide.

Apart from leading team operations, I have developed a centralised and co-operative decision making system among internal team members and helped a team to grow to the top level. As an outcome of this habit, I have played a game changer role in freelancing communities. With the help of a collaborative team, I have helped many businesses in making their innovative products & services a valuable brand in the market.

 WordPressCook

 hello@wordpresscook.com

 <http://wpcook.com>

The logo features the text "wpcook" in a white, lowercase, sans-serif font. Above the letter "o" is a white icon of a chef's hat. The entire logo is centered within a dark blue circle that has a white border. This circle is positioned on a light blue background that is filled with a repeating pattern of various white kitchen-related icons, such as a pizza, a teapot, a fork, a bowl, and a chef's hat.
