Professional Experience

Digital Monitoring Products   **2015-2016**
Ruby on Rails Developer
Developed and maintained a product called Virtual Keypad which serves out RESTful API's that runs on Android, iPhone, and web browsers. This API connects customers to their DMP security systems which allows the customers to arm/disarm their system, and also control lights, locks, and other smart home devices.

Web Development Projects

Comic Book Store - A comic book website that is a Single Page Application using Angular.JS and Bootstrap. The site will be a mock website that users can purchase the latest comic books.

The Melody Project - A web app that allows users to know what explicit content is in a song. Uses web crawlers to search music lyrics for explicit content. This app is currently being built with Ruby on Rails.

Education

Coding Dojo, Seattle, WA   **2015**
Blackbelt - Web Development Program
Completed intensive web development program, working more than 1000 hours. Achieved level of Blackbelt by passing qualifying exams.

Southwest Baptist University, Bolivar, MO   **2011**
Bachelor of Science in Psychology
Graduated with an emphasis in counseling. Took multiple electives in communication, relationship studies, and philosophy. Acquired strong communication and empathy skills.
